

Ladies and Gentlemen of the FCC.

I fully support the National Conference of Volunteer Examiner Coordinators (NCVEC)'s proposal to restructure the Part 97 Rules for United States radio operators using the amateur radio service. Their proposal makes the most sense to me. It meets the goals and purposes of amateur radio in the United States. Their proposal will ensure that US citizens or Nationals will promote the continued growth of amateur radio in this country. The NCVEC's proposal does not deter or restrict amateur radio operators that enjoy using radio telegraphy as a mode to communicate with operator will similar interest. Thank you for allowing me to express my feeling on this monumental issue facing US amateur radio operators.
